

INEOS

ECTA RC Workshop 29 Sept 2022

INEOS view

Emission Reduction Management

Overall Strategy INEOS group – Carbon Footprint Targets

INEOS has committed to reach

Net zero by 2050

And has set a

33 % reduction target by 2030 vs the 2019 baseline.

Different roadmaps are defined per individual site to achieve overall target.

INEOS – Contracted (Road) Transport

Contractual:

On an annual basis INEOS require **an LSP report** covering energy consumption for INEOS movements.

This report needs to be reported by the 25th January each year for the previous year.

The report must include:

- Total tonnage moved for INEOS.
- Total KM travelled for INEOS.
- CO² emissions/ton moved
- CO² emissions/KM travelled

Bottlenecks

Gathering reliable data – comparable reporting between carriers

Carrier	Gasoil [tCO2]	Gasoil [t]	Gasoil EF [tCO2/t]	reference
	1535	597	2.57	
	135	64	2.13	
	67	6	10.76	
	340	130	2.62	
	844	259	3.26	
	660	251	2.63	
	1130	40	28.59	
	408	161	2.54	
	172	65	2.65	
	192	60	3.18	
	2888	0	-	
	341	123	2.77	

Importance of a common methodology.

Intermodal / Road / Rail / Marine

Not all Hauliers are reporting data consistently yet -> learning phase also for INEOS!

(Only half reported data in Q1 2022)

SQAS 2022 will help for consistent yearly reporting allowing us to improve.

SQAS is mandatory for our O&P Europe business.

Q & A
