Steve Rowland will take over as Responsible Care director at ECTA, the European Chemical Transport Association, from Evert de Jong at the end of the year, when Evert will be retiring after seven years in the role. Steve has been working alongside Evert for the whole of 2023 so the handover should be smooth, although Steve is aware he is likely to have a busy 2024.

Next year's agenda includes the 2024 revision to SQAS, revisions to freight emissions guidelines, and updates to Cefic-ECTA best practice guidelines.
