

ECTA ZERO EMISSION KNOWLEDGE PLATFORM WEBINAR

“best ways to use the new GLEC framework – with examples for both big and small companies”

20.02.2024 09:30-10:30am (CET) JOIN FOR FREE

Presented by Smart Freight Centre, Hoyer and Van den Bosch

View the full Agenda: [here](#)

ECTA will host its first ECTA Zero Emission Knowledge Platform Webinar in 2024 and the participation will be again for free.

Companies which still struggle to calculate emissions and/or look for improving their calculation system will be interested in this Webinar. Moreover, it can be of interest for all people working in SHEQ and Sustainability of logistics.

We think the exchange of knowledge to improve our total industry should always be for free. With the same strategy we host our ECTA Zero Emission Knowledge Platform, which provides documents, references and relevant information regarding the goal of a Zero Emissions Transport Industry.

The aim is to provide and exchange knowledge relevant for Logistic Companies to work towards the emissions targets of 2030 and 2050.
