Register now for our next, free ECTA ZEKP Webinar:
“Best ways to use the GLEC framework – either for big or small companies”

20.02.2024 09:30-10:30

ECTA, the European Chemical Transport Association, has organised another webinar in its popular Zero Emission Knowledge Platform series, the latest addressing the new GLEC Framework developed by the Global Logistics Emissions Council. Alan Lewis, who as technical director of the Smart Freight Centre led the GLEC Framework project, will be the main speaker at the webinar, introducing the main changes from earlier GLEC projects and considering the pros and cons of using software to help with emissions calculations.

Also lined up to speak are Thies Grage of Hoyer and Brecht Den Otter of Van den Bosch, who will talk about their experiences of using the new system to calculate their emissions.

The free one-hour webinar will take place on 20 February, beginning at 09.30 CET.

Registration details can be found at <https://ecta.com/product/ecta-zekp-webinar-best-ways-to-use-the-new-glec-framework/>.
